Availability You Can Rely On.
Flexibility You Need.

Our multilevel security model protects your valuable data through:

- Secure socket layers (SSL) encryption.

- Restriction of site access to authorized administrators.

- Servers residing behind enterprise-class firewalls.

- Real-time monitoring for suspicious or unusual activity.

- Network penetration tests and vulnerability assessments.

- Advanced passwords and user credential protection.

The ExpenseWire® enterprise infrastructure provides secure, scalable, and reliable solutions for the most demanding organizations in the world. As a 100 percent on-demand, software-as-a-service (SaaS) application, there is no hardware or software to purchase, install, or maintain. The ExpenseWire platform handles highly secure financial transactions and easily scales to meet the growing needs of any organization – from small business to enterprise.

Security

ExpenseWire takes aggressive precautions to make sure your data and transactions are secure.

Reliability

ExpenseWire offers complete redundancy throughout the platform and uses multiple data centers to ensure 24/7 systems protection. We are committed to maintaining constant availability and regularly upgrade our security configurations to eliminate vulnerabilities and minimize errors.

- State-of-the-art, highly recoverable datacenters.

- Redundant, uninterruptible power systems (UPS).

- Daily backup of master files.

- Offsite storage of backup tapes and other critical supplies.

- Advanced, comprehensive disaster recovery plan.

ExpenseWire®

Scalability

In order to stay competitive, your organization needs a solution that can grow without disrupting your infrastructure and incurring additional costs. ExpenseWire is a highly scalable, multi-tenant solution that maximizes your investment so you can avoid the traditional costs of licensed software and IT infrastructure.

- Powerful, on-demand infrastructure.

- Services-oriented integration framework.

- Multi-tiered architecture.

- No hardware infrastructure to install or maintain.

- No licensed software to install or maintain.

- Lower overall total cost of ownership.

- Scalable programming methodologies.

Flexibility

Adapt to the changing business environment with the robust administrative toolbox provided by ExpenseWire. The SaaS interface provides anytime-anywhere access to define, configure, and update your expense management process. Simply log in to adjust your system settings, spending policies, data import and export files, as well as custom fields. With ExpenseWire, you can reduce data entry while capturing required information.

ExpenseWire integrates with:

- Personal and corporate credit cards.

- Travel platform service providers.

- Accounting and payroll systems.

In addition, you can:

- Export CSV or XML files.

- Access hundreds of configuration settings and custom fields.
